

## ELECTRONIC TOOLS TO HELP CHILDREN WITH COMMUNICATION DISABILITIES

Gergana Koleva

**Abstract.** *The article provides a comprehensive overview of the possibilities and effectiveness of electronic tools used in teaching and working with children with communication disorders. It describes the main features and characteristics of existing technologies such as software applications and communication devices. Their advantages, challenges in using them in real environment and their effectiveness compared to using traditional education methods are discussed. The research highlights the importance of electronic devices in teaching children with communication disorders because they significantly improve children's inclusion, engagement and facilitate the process of tracking their learning progress.*

**Key words:** Electronic tools, communication disabilities, education, children with special educational needs.
